

## GP ASSISTANT TRAINING

East of England Health Education England are currently reviewing the accredited training route for the new GPA role. We will contact PCNs and Practices as soon as further information is available on this. In the meantime, we would strongly suggest that current and newly appointed GPAs undertake training and competency assessment outlined in the GPA Competency Framework, supported by GP mentors in PCNs and Practices as per the ARRS requirement.

To support this internal training the SNEE Training Hub's rolling training programmes have a range of clinical and non-clinical courses that will provide key skills and learning, with more to follow:

- [Venepuncture Training](#)
- [Chaperone Training](#)
- [SNOMED \(Read Training\) SystmOne and EMIS Online](#)
- [Introduction to Medical Terminology](#)
- [Achieving Quality in Medical Records – Notes Summarising](#)
- [Correspondence Management and Workflow Optimisation](#)
- [Difficult Conversations and Alternatives to NO - masterclass](#)

In addition, each Practice currently has access to the clinical skills platform which is an invaluable resource providing readily available, user-friendly guides to a wide range of clinical skills that are regularly updated. More information on Clinical Skills Platform can be found here - [Clinicalskills.net](https://www.clinicalskills.net).
