

New Educational Supervisor Applications close 19th December 2025

Dental Foundation Training can provide a new challenge for you and your team. It can help you recruit new clinicians and retain your current workforce. For most newly qualified dentists, Dental Foundation Training (DFT) in general dental practice is the first step in their postgraduate professional life.

ESs and practices applying now will go through a formal selection and training process. A trainee will be allocated in the early summer 2026 and will start as a new member of your team on 1st September 2026.

The Suffolk and North East Essex Training Hub is keen to support dental practices to become Learning Organisations.

Becoming involved in Foundation Training and other Primary Care Training can have huge benefits for your practice environment; supporting and training the workforce of the future will help you to retain your workforce, as well as help with recruitment. There is currently expansion happening in dentistry, so there's never been a better time to get involved.
